DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-54, 56, 109, 111, and 112, drawn to a battery charging system tester for a vehicle with a microprocessor and cable for connecting to a battery, classified in class 320, subclass 104.
 - II. Claim 57-108, drawn to a method in a battery charging system for testing a battery charging system of a vehicle, classified in class 324, subclass 431.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process can be used by a materially different apparatus, such as one that does not include a microprocessor to carry out the actions, one that does not include cabling, or one that does not provide outputs for all of: the battery test, starter test, and charger system test.

3. IN GROUP I, this application contains claims directed to the following patentably distinct species: Claim 4 –Species 1; claim 5 –Species 2; claim 6 – Species 3; claim 7 –Species 4; claim 8 –Species 5. The species are independent or distinct because they contain the following different ratings standards respectively: SAE, DIN, IEC, EN, and JIS.

4. IN GROUP II, this application contains claims directed to the following patentably distinct species: Claim 60 –Species 1; claim 61 –Species 2; claim 62 – Species 3; claim 63 –

Species 4; claim 64 –Species 5. The species are independent or distinct because they contain the following different ratings standards, respectively: SAE, DIN, IEC, EN, and JIS.

If applicant elects Group I or II, applicant is FURTHER required under 35 U.S.C. 121 to elect a single disclosed species, as noted above, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3 and 57-59 appear generic, respectively, for Groups I and II.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5. Furthermore, although no 35 USC 112 rejection is being made at this time, examiner notes the following:

Where, in view of the nature and scope of applicant's invention, applicant presents an unreasonable number of claims which ** are repetitious and multiplied, the net result of which is to confuse rather than to clarify, a rejection on undue multiplicity based on 35 U.S.C. 112, second paragraph, may be appropriate. As noted by the court in *In re Chandler*, 319 F.2d 211, 225, 138 USPQ 138, 148 (CCPA 1963), "applicants should be allowed reasonable latitude in stating their claims in regard to number and phraseology employed. The right of applicants to freedom of choice in selecting phraseology which truly points out and defines their inventions should not be abridged. Such latitude, however, should not be extended to sanction that degree of repetition and multiplicity which beclouds definition in a maze of confusion. The rule of reason should be practiced and applied on the basis of the relevant facts and circumstances in each individual case." See also *In re Flint*, 411 F.2d 1353, 1357, 162 USPQ 228, 231 (CCPA 1969).
